Feature	Specification / Benefit
Product Name	Beehive Machine: Double End Saw (Hive Machine)
Primary Function	Simultaneously cuts and profiles both ends of wooden boards for beehive components.
Construction	Heavy-duty steel frame, professional electricals, precision linear guides.
Motors	2 x 2.2KW
Board Width	350-550 mm (Standard); Customizable
Power Supply	3-Phase 380V (Standard); 3-Phase 220V (Customizable)
Air Pressure	≥0.7 Mpa (Customer-supplied air pump)
Output Efficiency	Approx. 360 pieces/hour
Key Operations	Pneumatic clamping, dual synchronized sawing.
Safety	E-stop, protective guards, electrical warnings.
Target Customers	Commercial beeyards, beehive manufacturers, bee equipment distributors.
Key Advantages	Precision, high efficiency, durability, customization, ease of use.
Customization	Cutting width, voltage for your specific hive machine needs.
After-Sales	Spare parts and support available for your hive machine .
High-Volume Option	Four End Saw hive machine available for increased capacity.
