

Digital Honey Refractometer For Precision Measurement Of Optimal Honey Quality

Item Number: HR-02

Introduction

Accurate digital honey refractometer for moisture, Brix, RI & temperature. Essential for beekeepers & processors. Fast, precise, portable. Buy now!

Feature	Description	Value/Benefit for Professionals
Measurement Scales	Water %, Brix, Refractive Index (RI)	Comprehensive, accurate digital analysis.
Accuracy/Resolution	High precision, often to 0.1% or 0.0001 RI	Reliable data for critical quality decisions.
Automatic Temp. Comp. (ATC)	Built-in, wide range (e.g., 0-40°C)	Ensures measurement accuracy across varying environmental temperatures.
Display Type	Large, clear LCD with multiple readings	Easy to read, reduces error, shows all relevant data at a glance.
Operation	Simple 3-button interface, small sample volume	Quick, efficient, and user-friendly testing.
Calibration	Easy, typically with distilled water	Maintains instrument accuracy with minimal effort.
Portability	Compact, lightweight, battery-powered, with protective case	Ideal for both field and laboratory use.
Dimensions/Weight	Approx. 121x58x25mm / 90g (without battery)	Convenient to carry and handle.
