Feature	Description	Benefit
Material	High-grade, corrosion-resistant galvanized steel.	Durable, long-lasting, easy to clean, and provides reliable protection against rust.
Design	Precision-coiled spring/spiral construction with an integrated hanging loop.	Provides excellent airflow and pheromone exchange, leading to higher queen acceptance rates.
Functionality	Open end for candy plug; flexible body.	Supports classic slow-release introduction and allows secure placement over queen cells on the comb.
Primary Applications	Queen introduction, protecting queen cells, and temporary queen confinement.	A versatile, multi-purpose tool for essential queen management tasks.
Appearance	Professional, clean, metallic finish.	Reflects a high standard of quality and professionalism in your beekeeping operation.
