

Heavy-Duty Stainless Steel Frame Perch

Item Number: BFP-3

Introduction

Stainless Steel Frame Perch for beekeepers. Holds 8 frames, protects comb, and improves hive inspection efficiency.

[Learn More](#)

Feature	Description & Benefit
High Frame Capacity	The 20cm long resting arm is designed to comfortably hold about 5 standard frames, making it ideal for deep hive inspections or reorganizations.
Keeps Frames Safe & Clean	By using this Frame Perch, beekeepers no longer need to place frames on the ground. This prevents contamination of the comb with dirt or grass, protects the queen if she is on an outside frame, and avoids crushing bees.
Creates Working Space	Hanging the first few frames on the perch frees up critical space inside the hive box. This makes it much easier to inspect, manipulate, and remove the remaining frames without rolling or damaging bees.
Universal Compatibility	The hooks are designed with a standard 2.2cm depth, making this Frame Perch compatible with most standard Langstroth hive bodies and other similarly sized equipment.
Improves Workflow	This tool streamlines the inspection process, keeping frames organized in the order they were removed. This systematic approach saves time and reduces disruption to the colony.

Parameter	Details
Product Name	Stainless Steel Frame Perch / Frame Holder
Material	High-Grade Stainless Steel
Overall Length	45.5 cm
Frame Holding Arm Length	20 cm
Hook Depth	2.2 cm
Capacity	Holds about 5 standard frames

Feature Summary	Benefit for Your Business
Durable Single-Piece Construction	A long-lasting tool with no breakable parts, offering excellent value and reliability.
Increased Beekeeper Efficiency	Saves time during inspections, allowing commercial beekeepers to manage more hives effectively.
Promotes Hive Health & Hygiene	Prevents comb damage and contamination, a key selling point for quality-conscious beekeepers.
Essential, High-Demand Item	This is a fundamental tool that every beekeeper needs, ensuring consistent sales for distributors.
Simple and Effective	Its intuitive design makes it a valuable and easy-to-use tool for beekeepers of all experience levels.
