Feature	Description	Benefit for Wholesaler/Commercial Beekeeper
Product Name	HONESTBEE Pneumatic Dual Wire Embedder	Clearly identifies the product and its primary function.
Primary Function	Embeds "W" pattern wire into two beeswax foundation sheets simultaneously.	Increases output, ensures strong comb support.
Construction	Sturdy wood/composite base & press, metal clamps, pneumatic actuators.	Durability for commercial use, reliable performance.
Operation	Foot-pedal activated, pneumatic system for heating/pressing.	Hands-free operation, consistent embedding, ease of use.
Capacity	Dual foundation sheet processing.	Significant time and labor savings, high throughput.
Wiring Pattern	Specialized for "W" (zigzag) pattern.	Produces foundation with optimal structural integrity.
Target Audience	Commercial beekeepers, bee equipment distributors.	Addresses specific needs for high-volume, professional-grade equipment.
Professionalism & Durability	Clean design, robust materials, quality components.	Long service life, reliable investment, reflects well on your brand/operation.
