Feature	Description	Value to Customer
Core Function	All-in-one shaping of self-spacing side bars, including assembly notches for top/bottom bars and side profiles.	Streamlines a complex manufacturing process into a single, automated step for fast assembly.
Power System	Standard 3-Phase 380V/50Hz, with custom 220V/60Hz option.	Provides flexibility for international clients and ensures compatibility with local power grids.
Customization	The machine can be custom-built to produce non-standard frame side bar designs.	A future-proof investment that can adapt to your evolving product lines and unique needs.
Construction	Heavy-duty, powder-coated steel frame.	Ensures long-term durability, operational stability, and a professional appearance.
Target Audience	Commercial Beekeepers & Beekeeping Equipment Suppliers.	A professional machine designed for high-volume, commercial-grade frame production.
Primary Benefit	Produces perfectly consistent, assembly-ready, self-spacing side bars with massive time savings.	Increases profitability, improves product quality, and eliminates production bottlenecks.
