Feature	Specification
Product Name	HONESTBEE Side Bar Slicer (Bee Frame Machine / Bee Hive Frame Machine Component)
Primary Function	Slices pre-formed side bar blanks into individual pieces for beehive frames
Motor	1 x 11KW
Saw Blades	15 or 16 (Customizable based on processing width)
Processing Length	Standard 232mm / 159mm (Fully Customizable)
Incoming Blank Thickness	Standard 35mm (Fully Customizable)
Output Efficiency	Processes ~1200 blanks/hour (final pieces depend on slices per blank)
Power Supply	3-Phase, 380V (Customizable to 3-Phase 220V)
Air Pressure Requirement	≥0.7 Mpa (Air pump to be self-provided)
Customization	Frame type (Langstroth, Dadant, British, etc.), dimensions for diverse bee frame making machine needs.
Material Processed	Pre-formed wooden side bar blanks
Target Customers	Commercial Apiaries, Beekeeping Equipment Distributors requiring efficient bee hive frame machine solutions.
