Feature	Specification
Product Name	Top Bar and Bottom Bar Grooving Machine (Essential Bee Frame Machine Component)
Primary Function	Cuts internal grooves in frame top/bottom bars for beehive frames
Motor	1 x 1.5KW
Cutting Tool	1 (Customizable for groove width/depth)
Wood Width (Input)	Standard 19-26mm (Customizable)
Wood Thickness (Input)	Standard 10mm (Customizable)
Output Efficiency	Approximately 600 pieces/hour
Power Supply	3-Phase, 380V (Customizable to 3-Phase 220V)
Air Pressure Requirement	≥0.7 Mpa (Air pump to be self-provided)
Customization	Frame type, wood dimensions, groove specifications for various bee frames
Material Processed	Wooden top/bottom bars (components for bee frames)
Target Customers	Commercial Apiaries, Beekeeping Equipment Distributors needing specialized bee frame machine components for their bee frame making machine lines.
