

In-Hive Dual Compartment Frame Bee Feeder For Targeted Colony Nutrition

Item Number: BF-03

Introduction

HONESTBEE In-Hive Frame Feeder: Dual-compartment design for safe, efficient bee feeding. Reduces drowning risk with ribbed surfaces. Durable, food-grade plastic. Ideal for commercial beekeepers.

[Learn More](#)

Feature	Description	Benefit
Design	In-hive frame feeder, replaces 1 or 2 frames	Targeted, internal feeding; fits standard hive equipment
Compartments	Large syrup reservoir + smaller, dry bee access compartment/ladder	Efficient feeding, drastically reduces bee drowning
Material	High-quality, translucent, food-grade plastic	Durable, hygienic, allows feed level checks
Interior Surface	Ribbed texture	Provides bee grip, further prevents drowning
Placement	Hangs on frame rests inside hive body/super	Feed close to cluster, utilizes hive warmth, reduced robbing risk
Bee Safety	Dedicated access design and textured surfaces	Minimizes bee loss during feeding
Sizes	Available for standard frame dimensions (e.g., deep/medium, 1 or 2 frame width)	Versatile for different hive setups and feeding needs
Primary Use	Supplemental feeding for nucs, new colonies, dearth periods	Supports colony establishment, growth, and survival
