Feature	Description	Value/Benefit for Professionals
Measurement Scales	Water (12-27%), Brix (58-90%), Baumé (38-43° Be')	Comprehensive honey analysis in one device.
Automatic Temp. Comp. (ATC)	Corrects for temperature variations (e.g., 10-30°C)	Ensures accurate, reliable readings in various environments without manual adjustments.
Precision	Fine scale divisions (e.g., 0.1% for water)	Enables precise quality grading and adherence to standards.
Construction	Durable metal body, quality optics, non-slip grip	Long-lasting, reliable performance in field and lab conditions.
Ease of Use	Simple sample application, direct reading through eyepiece	Quick, efficient testing, minimal training required.
Portability	Handheld design with protective case	Convenient for on-site testing at apiaries or receiving docks.
