Feature	Benefit
4-Frame Self-Reversing	Automates the extraction process, saving significant time and manual labor.
Stainless Steel Body	Ensures food-grade safety, long-lasting durability, and is easy to clean and maintain.
250W Bottom-Mounted Motor	Provides powerful, stable, and efficient operation with a quiet belt-drive system.
Variable Speed Controller	Offers precise control to protect delicate combs and maximize honey yield.
Heavy-Duty Frame	Guarantees stability and minimizes vibration during high-speed extraction.
Customizable Options	Available for Dadant frames and with various international plug types to suit diverse market needs.
