Feature	Description	Benefit for Your Operation
Product Name	Electric Wire Embedder	Efficiently embeds wire into beeswax foundation.
Power Supply Unit	Robust casing, ventilated, 40W power.	Durable, safe operation, optimal power for effective embedding.
Input Voltage	110-220V	Versatile for various power sources.
Output Voltage	9V	Safe, controlled heating of wires.
Plug Type	Customizable	Adaptable to diverse regional electrical standards.
Probes	Insulated, color-coded handles; knurled metal collars; sharp, precision metal tips.	Ergonomic, safe handling; precise and durable contact points.
Primary Material	High-grade durable plastics, quality metal components.	Designed for longevity and resilience in demanding professional settings.
Core Function	Heats frame support wires for seamless embedding into beeswax foundation sheets.	Creates strong, stable, and well-supported honey combs.
Target Audience	Commercial Beekeepers, Beekeeping Equipment Distributors.	Essential tool for high-volume frame preparation and a valuable addition to product ranges for resale.
