Feature	Description	Benefit for the User
Material	High-density, UV-resistant plastic	Long-lasting, all-weather durability; will not rot, warp, or splinter. Easy to clean and sterilize.
Reversible Design	Two unique sides: one notched, one perforated.	Instantly switch between entrance reducer/mouse guard and a ventilated travel/excluder gate.
Functionality	4-in-1: Entrance Reducer, Mouse Guard, Travel Screen, Queen/Drone Excluder.	Consolidates equipment needs, saving space, time, and money. Streamlines apiary management.
Ventilation System	Large perforated area with adjustable sliders.	Provides excellent airflow to reduce stress during hive transport or confinement.
Sizing Options	Available in 315mm, 370mm, and 432mm lengths.	Fits the most common hive types, including 8-frame and 10-frame Langstroth, and Dadant hives.
Color Variety	Offered in multiple colors.	Allows beekeepers to color-code hives for easy identification and record-keeping.
