

Professional Wooden Requeening Frame For Beekeeping

Item Number: RF-1

Introduction

Boost queen acceptance rates with HONESTBEE's Professional Wooden Requeening Frame for Langstroth hives.

[Learn More](#)

Feature	Description	Benefit
Material	High-quality natural wood frame with durable metal hardware cloth and a metal release tab.	Robust, long-lasting, and designed for repeated use in a professional apiary environment.
Design	Langstroth-compatible frame with a holder for a standard queen cage and a large screened area.	Seamlessly integrates into existing equipment; no special modifications needed.
Functionality	Facilitates a slow, controlled queen introduction with maximum bee-to-queen contact.	Drastically increases queen acceptance rates by allowing for rapid pheromone distribution.
Primary Application	Requeening established colonies, introducing queens to new packages or splits.	The safest and most effective method for ensuring the success of a new queen.
Target User	Professional beekeepers and serious hobbyists seeking to maximize the success of their requeening efforts.	A professional tool for a critical beekeeping task, leading to healthier and more productive colonies.
