Feature	Description & Benefit
All-Stainless-Steel Build	Provides exceptional durability, is completely rust-proof, and can be easily sanitized for superior apiary hygiene.
Secure Clamping Jaws	The precision-shaped jaws hook firmly onto the top bar of the frame, ensuring a non-slip grip that prevents dropping frames.
Straight Vertical Lift	The scissor mechanism ensures frames are lifted straight up, minimizing disruption to the hive and protecting bees from being crushed.
Reduces Hand Strain	The ergonomic handle and powerful mechanism do the hard work, making it easier to lift heavy frames and reducing beekeeper fatigue.

Parameter	Details
Product Name	Stainless Steel Frame Grip
Material	High-Grade Stainless Steel
Dimensions (W x H)	130mm x 128mm
Weight	Approx. 194g

Feature Summary	Benefit for Your Business
Durable & Long-Lasting	A one-time purchase that provides years of reliable service, offering excellent return on investment.
Increased Beekeeper Efficiency	Faster and safer frame handling allows commercial beekeepers to manage more hives in less time.
Promotes Colony Health	Minimizes bee casualties and allows for easy sanitation, key selling points for quality-conscious customers.
Professional-Grade Tool	A high-quality item that reflects well on the user and is a strong addition to any distributor's catalog.
