Parameter	Description
Material	Made of stainless steel, which is sturdy and difficult to bend or break.
Use	Great for lifting frames and scraping off excess wax or propolis on frames and hive walls.
Durability	Thick, strong feel with an ideally sized handle, easy to store in beekeeping jacket pockets, smoker, or tool box.
Features	Double beveled edges for scraping propolis, hook end for pulling frames without damaging equipment.
Value	Combination of price and features make this tool a preferred choice.
